Adina Renee Adler, Executive Director
Global Steel Climate Council Inc.®

Corporate Average Steel Intensity (CASEI)

Reporting Year 2024

Value: t CO₂e/t steel 0.88

Science-Based Emissions Targets (SBET)

Short-Term Target Year	2030	Long-Term Target Year	2050
---------------------------	------	--------------------------	------

Value: t CO ₂ e/t steel	0.83	Value: t CO ₂ e/t steel	0.12
------------------------------------	------	------------------------------------	------

Statement of Scope: CASEI and SBET values were developed in conformance with the GSCC® Steel Climate Standard. Values are indicated as tons of CO₂e per metric ton of steel. For more information, visit GlobalSteelClimateCouncil.org.

Validity

Issue Date	12 March 2026
Expiry Date	12 March 2031

CASEI Self- Declaration Due Date	12 March 2027
-------------------------------------	---------------

The CASEI and SBET values provided herein were certified by the member company's GSCC®-approved certification body and reviewed anonymously by the GSCC® Technical Committee according to the flowchart outlined in Appendix C of the Supplemental Technical Guidance. The values are confirmed to be in line with the glide path to achieve the Paris Climate Agreement's 1.5° C scenario by 2050 goal. The data can also be found on the company's website, which is a requirement stipulated in The Steel Climate Standard.
